The DHY14000RVI is a compact and lightweight diesel generator designed to be permanently mounted on top of a large motorhome, a race truck, a mobile billboard vehicle or specialist vehicle. Providing a convenient and cost-effective source of power, this generator has an impressive maximum output of 14kW.

Powered by a 4-stroke OHV water-cooled 3TNV76 diesel engine, the DHY14000RVI is able to produce up to 14kW and is more than capable of powering televisions, large heaters, air conditioning, air pumps for inflatable beds, hairdryers, laptops, phone chargers, lights, etc.

Motorhome Generator

This diesel generator ideal for use with your motorhome or sports home, allowing you to take both modern luxuries and home comforts with you wherever you go.

Able to produce a pure sinewave output, this means that this petrol generator can safely power all sensitive electronics, such as TVs, laptops, etc, without the risk of damaging or overloading them.

Easy To Use

This generator is really easy to use, making it extremely popular for powering family holidays, and it's also built with low maintenance requirements for cost-effective, fuss-free power whilst away from home.

Safe-To-Mount Quiet Generator

The digital control panel is mounted inside the vehicle - connected to the generator via an 8m USB cable - allowing you to start and stop the generator without having to go outside into the elements. This control panel also allows you to monitor fuel level, oil level, frequency, AC voltage, power usage, battery voltage and hours run.

Delivering low noise, extremely low vibration and excellent fuel economy at 291g / kw/h @ 75% load, the DHY14000RVI ranges from 10kVA~30kVA with a variable speed operation of 1600rpm - 2400rpm.

2 Year Warranty

This 14kW diesel generator is covered by our **2 year Hyundai domestic warranty*** / **1 year commercial warranty*** (terms apply).

Specifications

Dimensions (H x W x L) (mm)	1520X604X750
