

Petrol Power Generator 4kVA 15 Daewoo -Super Silent System

Measurements	620x500x520mm
Capacity	2.8KVA
Connection	2x230V
Weight	43kg

The Daewoo **GDAX4050 Gasoline Generator** is designed for efficient and reliable power in a compact package. With **2500 running watts** and a **maximum output of 2800 watts**, it provides the perfect solution for powering tools, appliances, and other essential equipment on the go. Featuring a powerful **212cc engine**, this generator operates at **220V, 50Hz**, ensuring consistent performance wherever you need it.

Ideal for outdoor events, job sites, and home backup, the GDAX4050 delivers convenience and portability with every use.

FAQs

What tools can the GDAX4050 power at a job site?

With **2500 running watts** and **2800 maximum watts**, the GDAX4050 can operate a wide range of job-site tools, including:

- Power drills and saws
- Grinders and sanders
- Small air compressors
- Lighting systems
- Pressure washers

Its steady 220V, 50Hz output makes it reliable for both light and medium-duty equipment used on construction or maintenance sites.

How long can the generator run on a full tank of petrol?

Runtime depends on load, but the GDAX4050 is designed to provide **several hours of continuous operation** on a full tank. Its efficient 212cc engine ensures reliable performance for outdoor events, job sites, or home backup without needing frequent refueling.
