Order before midday to get free next day delivery.

Measurements	750x700x610mm
Capacity	6.5KVA
Connection	1x230V+1x400V
Weight	42kg
Fuel	25L Petrol

The **Daewoo GDAX9250E-3 Gasoline Generator** offers powerful, reliable performance with **6000 running watts** and a **maximum output of 6500 watts**. Powered by a robust **420cc engine**, this generator is designed to handle heavy-duty tasks with ease, providing **220V, 50Hz, 3-phase** power to suit various commercial and industrial needs.

Equipped with **electric start** and **push-button operation**, the GDAX9250E-3 ensures quick, effortless starts, even in challenging conditions. Ideal for powering multiple tools and equipment, this generator combines performance with convenience in one compact, durable unit.

FAQs

What safety features protect against overload or surges?

The generator includes key safety protections such as:

- **Overload circuit breakers**
- **Voltage regulation** to prevent surges
- **Low-oil shutdown** to protect the engine
- **Thermal protection** on key components

These features help safeguard both the generator and connected equipment during heavy or prolonged use.
