

GDA 2500IS

Petrol Power Inverter Generator 2.2kVA Daewoo -Super Silent System

Measurements	650x350x550mm
Capacity	2,2KVA
Connection	2x230V
Weight	22kg
Fuel	Petrol

The **Daewoo GDA2500iS Inverter Generator** provides reliable, clean power for sensitive electronics with its **2000 running watts** and **2200 maximum watts**. Powered by a compact yet efficient **80cc engine**, this generator operates at **50Hz** and is perfect for outdoor activities, camping, and small appliances.

Thanks to inverter technology, the GDA2500iS delivers stable, quiet, and efficient energy, making it an excellent choice for powering delicate devices without the risk of damage. Lightweight and portable, it offers convenience and reliability in one sleek package.

FAQs

What is the fuel consumption rate of the DAGFS100 under normal load?

The exact fuel consumption varies based on load level, but the DAGFS100 is engineered for **efficient operation even under demanding conditions**. Powered by the Daewoo R6105AZD engine, this generator maintains steady consumption during continuous use, offering a strong balance between fuel efficiency and high power output typical of industrial-grade 100 kVA systems. For precise consumption figures, refer to the model's technical fuel chart.
