

Diesel Generator 12,000w Daewoo -Super Silent System

Air-Cooled Diesel Generator. Power Of 11 KW (13.8 KVA) And Standby Power Of 12 KW (15 KVA)

Measurements	1250x650x760mm
Capacity	13.8KVA
Connection	380V
Weight	300kg
Fuel	Diesel – 200l tank

Built for efficiency and reliability, the **DAGFS-15AC** diesel generator with an integrated air cooler offers a powerful and steady energy source for demanding applications. Designed to operate at **380 volts** with a **frequency of 50 Hz** and a **rated current of 20.9 amps**, this generator ensures stable power delivery in various industrial and commercial settings.

Whether used as a primary power source or backup support, the DAGFS-15AC is a dependable solution that combines solid electrical output with smart cooling technology for long-lasting durability. With a **Fuel consumption of only 4.1 liters per hour** the **DAGFS-15AC** also extremely economical in operation.

FAQs

What industrial applications benefit most from this model? —

The DAGFS-15AC is ideal for:

- Manufacturing equipment
- Workshop tools and machinery
- Industrial lighting systems
- Small factory operations
- Agricultural equipment
- Commercial building backup
